ROUND 12 CONTRACTORS

(ALPHABETICALLY LISTED)

Alayne Renee Blickle (\$45,000) Contact: Alayne Renee Blickle

Phone: (425) 432-6116

Counties: King, Snohomish, Skagit, and Whatcom

• The Horses for Clean Water (HCW) program will teach and promote environmentally sensitive horsekeeping, including pasture, manure and mud management to reduce runoff pollution that can threaten shellfish and other resources. Focusing on the Bear Creek, Swamp Creek, North Creek, French Creek and Samish Bay watersheds, HCW will offer two classroom series and conduct two farm tours of demonstration farms established during the project. HCW will also create a manual for class use describing environmentally sensitive horsekeeping practices and place related articles in regional equine publications.

Bremerton-Kitsap County Health Department (\$32,492)

Contact: Scott Daniels Phone: (360) 692-3611

County: Kitsap

• The Sound Boater program educates recreational boaters about the harm to water quality and habitat that can result from improper waste disposal and inappropriate boating and boat maintenance practices. Through a subcontract with Washington Sea Grant, the county will run two sessions of stewardship training with graduates committing to volunteer in water quality or habitat-enhancing projects with a boating or marina focus. The project will also develop and distribute information packets to boaters, and post signs at all Kitsap County moorage facilities to promote the use of sewage pump-out facilities.

City of Lacey (\$10,052)

Contact: Lisa Dennis-Perez Phone: (360) 438-2687 County: Thurston

• The City of Lacey will initiate the **Homeowner Association Stormwater Maintenance** project to motivate and train homeowners and homeowner associations to maintain privately owned stormwater ponds. Through three workshops, homeowners will learn about the importance of stormwater facility maintenance and the best methods to maintain their ponds. These homeowners and other family members will participate in work parties to reinforce awareness and provide the opportunity to try the methods presented in the workshop. To promote long-term care of these facilities, city staff will also join homeowners in an inspection of their ponds to identify and discuss opportunities for continued storm pond maintenance.

ROUND 12 CONTRACTORS

(ALPHABETICALLY LISTED)

City of SeaTac (\$45,000) Contact: Theron Shaw Phone: (206) 248-6125

County: King

• The City of SeaTac will implement Phase II of the **SeaTac Businesses for Clean Water** program by expanding the current project to include 20 businesses from a second highly urbanized Des Moines Creek sub-basin. Businesses will receive technical assistance to identify and reduce sources of stormwater pollution. The city will assess the types and levels of pollutants entering the creek through water quality monitoring at three sites, including above and below the area targeted for business assistance. In addition, the project aims to expand participation in the SeaTac Stream Stewards, a voluntary group of local teachers, students, and residents who monitor water quality in Des Moines Creek. This project is funded partly with King county Department of Natural Resources through their WaterWorks program.

City of Tacoma Public Works Department (\$42,233)

Contact: Chris Gleason Phone: (253) 591-5066

County: Pierce

• The *EnviroChallenger*, a modified van, will carry seven hands-on, interactive environmental science lessons to 5,000 public and private elementary students in Tacoma. Secondary outreach will include youth organizations as well as community events. Lessons will include exploration of watersheds, water quality and salmon in addition to others on recycling and waste prevention.

Friends of the San Juans (\$30,500)

Contact: Kevin Ranker Phone: (360) 378-2319 County: San Juan

• The Friends of the San Juans will initiate the **Shoreline Stewardship Project** to improve understanding of the shorelines of the San Juan Archipelago and to educate citizens about the importance of these habitats. Through increased promotion and training, the group aims to expand the current Citizen Shoreline Inventory program in San Juan County. In cooperation with People for Puget Sound and the San Juan Island National Historical Park, Friends will coordinate citizen volunteers to pilot a Rapid Shoreline Inventory of the park to provide baseline data and identify sensitive areas. In partnership with the Whale Museum, the group will develop an interactive exhibit spotlighting Puget Sound's shoreline habitat, the inventory program, and People for Puget Sound's *Citizen Shoreline Atlas*.

ROUND 12 CONTRACTORS

(ALPHABETICALLY LISTED)

Hood Canal School (\$23,460)

Contact: Laurie Byrd Phone: (360) 877-5463

County: Mason

• Hood Canal School will expand their **Riparian and Environmental Enhancement** project's watershed protection efforts through equipment purchases made possible with PIE funding. Under the cooperative oversight of the Skokomish Tribe's Department of Fisheries, the Mason County Conservation District and the U.S. Forest Service, students will participate in both classroom lessons and field restoration projects. Special projects include adopting a wetland near the school, planting and monitoring riparian restoration projects, and studying and documenting the growth of Olympia oysters seeded by students in 1999. Students also will make special classroom presentations on environmental issues to K-5 students at the school and hold an Earth Day Fair in 2001.

Korean Women's Association (\$45,000)

Contact: Faaluaina Pritchard Phone: (253) 535-4202

County: Pierce

• Building on a two-year collaboration between resource agencies and Asian Pacific Islander (API) communities in Pierce County, the Korean Women's Association will expand student involvement in the preservation and protection of shellfish habitat through its **Asian Pacific Islander Youth Shellfish Outreach** program. Youth employed in this summer program will sample water quality and shellfish from area beaches. Through presentations at community meal sites, the youth will provide information about safe, sustainable shellfish harvesting to 500 API elders. In addition, they will educate 10 API businesses about selling certified shellfish. To spread the message about sustainable harvesting, the project will also develop a video public service announcement for community access television.

Master Builders Association of King & Snohomish Counties (\$30,000)

Contact: Doug Lengel Phone: (800) 522-2209

Counties: King, Kitsap and Snohomish

• Under their PIE contract, the Master Builders Association of King & Snohomish Counties will conduct six full-day **Fish-Friendly Construction Workshops.** The workshops aim to educate contractors, developers, real estate and other industry professionals in sustainable building techniques designed to protect water quality, water quantity, and salmon habitat. Two series of workshops (Fall 2000 and Spring 2001) will be in King, Kitsap and Snohomish Counties. Industry professionals from Pierce, Clallam, Jefferson and Mason Counties are anticipated to attend.

ROUND 12 CONTRACTORS

(ALPHABETICALLY LISTED)

Contact: Susan Berta Phone: (360) 579-1272

County: Island

• As part of the Maxwelton Salmon Adventure's (MSA) Watershed Stewardship Program, this **Landowner Education and Involvement Project** will educate watershed landowners and directly involve them in restoring riparian habitat in the Maxwelton and Glendale watersheds of Whidbey Island. MSA will provide educational forums, consultation, technical assistance and training to landowners and involve them in implementing restoration activities on individual properties.

Metro Parks' Tacoma Nature Center (\$18,824)

Contact: Carly Gelarden Phone: (253) 591-6439

County: Pierce

• The Swan Creek Watershed Citizen/Youth Partnership project seeks to provide the youth and citizens of Tacoma's Salishan and Eastside communities the opportunity to discover and become caretakers of the Swan Creek Natural Area. In partnership with Gault and McIlvaigh Middle Schools, Chief Leschi School, and the Eastside 4-H Ecology Club, the project will recruit student leaders who will then participate in individual and group projects to increase stewardship of the Swan Creek watershed. These student leaders also will help run two one-week watershed day camps for elementary-aged students as well as participate in a Swan Creek summit and other community events.

People for Puget Sound (\$39,500)

Contact: Tom Dean Phone: (206) 382-7007 County: Soundwide

• People for Puget Sound will promote and expand volunteer stewardship and citizen monitoring of nearshore habitat throughout Puget Sound. The organization will develop and pilot a citizen-based **Rapid Shoreline Inventory** program in partnership with the Friends of the San Juans to quickly and accurately inventory contiguous sections of shoreline. This information—and other citizen monitoring results—will be provided to resource managers and other interested individuals on their website's *Citizen Shoreline Atlas*. People for Puget Sound also will develop and test a bird survey to add to their current citizen-based estuary restoration monitoring efforts. Tracking bird presence and usage of a restoration site may help volunteers and researchers understand whether a restored site is able to function as salmon habitat.

ROUND 12 CONTRACTORS

(ALPHABETICALLY LISTED)

Contact: Robyn du Pré Phone: (360) 733-8307 County: Whatcom

• Through this project, **The Journey Home: Exploring Salmon Habitats in Whatcom County,** local decision-makers and citizens will have the opportunity to attend one of three day-long tours of salmon habitats. Participants will learn about the variety of impediments facing salmon during their spawning migration, rearing and juvenile phases, and return to the sea. They will also learn about best management practices to mitigate some of these impacts. A booklet, *The Journey Home*, will share these messages with others in the community.

Seabeck Alki Salmon Team (\$12,500)

Contact: Jerry Zumdieck Phone: (360) 830-4230

County: Kitsap

• The Salmon Team will expand current efforts to educate children and their community about salmon and salmon habitat. The **Salmon Team kids** will design and present a traveling slide show to area elementary schools and community groups. To complement the slide show, the team will produce a book about salmon and distribute it to the classrooms and groups they visit. The adult leaders of the team will develop a guidebook to help others develop similar salmon teams in their communities.

Seattle/King County Department of Public Health (\$8,000)

Contact: Gordon Clemans Phone: (206) 296-3989

County: King

• The Seattle/King County Department of Public Health will provide information and tools to owners of on-site sewage systems (OSS) through six workshops and **Septic Systems:** A **Homeowner's Guide**. The workshops will help homeowners better understand, operate, and maintain their particular type of OSS. Improved operation and maintenance of these systems increases their life expectancy and performance while at the same time minimizing premature failures that threaten waters flowing to Puget Sound.

ROUND 12 CONTRACTORS

(ALPHABETICALLY LISTED)

WSU Cooperative Extension-Thurston County (\$14,504)

Contact: Robert Simmons Phone: (360) 786-5445 County: Thurston

• To enhance the success of volunteer riparian restoration projects, this PIE project will demonstrate correct riparian replanting techniques through its **Replanting Riparian Areas Video and Booklet**. In the spring of 2001, restoration volunteers—coordinated through project partners—will use these tools to improve their planting skills. WSU Cooperative Extension will make the video and booklet directly accessible through the web in a readily downloadable format.
